Some insurance carriers treat safety programs as one-size-fits-all. Texas Mutual understands that your employees face unique hazards on the job. Here are some of the things that set us apart from other carriers.

Experienced. We employ more than 30 safety professionals who average upward of 20 years' experience. They can help you identify and eliminate the root causes of workplace accidents.

Local. We are strategically located across the state, and we are dedicated to serving only Texas employers.

Versatile. Our safety professionals know your industry. Their areas of expertise include agriculture and ranching, construction, manufacturing, warehousing, healthcare, oil and gas, retail and wholesale, transportation, timber and logging.

On-site. We make about 10,000 on-site policyholder visits per year, more than any other company.

Online. The free safety resource center at texasmutual.com offers streaming videos on a variety of safety topics. You can also visit the resource center to evaluate your safety program, identify improvement opportunities, calculate the true costs of workplace accidents, and download training materials from our multimedia library.

Training. We offer free, on-site classes and workshops across the state. Our professionals teach you how to promote safety awareness among your staff, control your insurance costs and meet safety-related regulatory requirements.

IN OUR POLICYHOLDERS' WORDS

“Using the tools Texas Mutual provides, our accidents have decreased, which has helped us earn dividends and lower our workers’ comp costs, no question. For us, Texas Mutual is a true partner.”

– Rick Guerra, Chief Executive Officer
Costillas, LTD./Pasta Ventures, LTD.

“Texas Mutual’s loss prevention consultant was instrumental in helping lower our (claim) costs and premium, and they provide an excellent service. They are always available when we need them.”

– Jo Luecht-Medlin, HR Director
San Antonio Zoological Society

“A few years back, we had substantial losses in a couple of different areas. Our loss prevention consultant sat down with me and did a loss evaluation on each of our locations... made some determinations of where the problems likely were, implemented solutions, and we went from 56 claims one year to six claims the next year.”
